

QRCUS INTEGRATION KIT FOR SAP SOLUTION MANAGER.

Qrcus moves SAP Solution Manager to a higher level via Qrcus Integration Kit

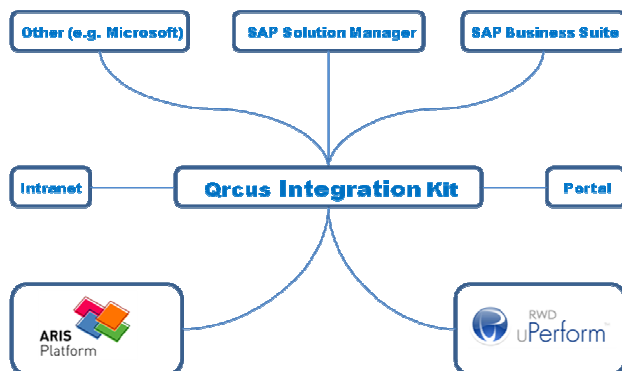

No matter how good your enterprise and system documentation is. It is only as effective as the proficiency of the people using it.

How it works

In short, the Qrcus Integration Kit allows you to turn your SAP Solution Manager into an active center of control for your documentation. It is a user-centered view of documentation and offers the opportunity to view the documents in every way you prefer (e.g. ARIS, SAP Solution Manager, RWD uPerform®). The fully integrated solution of Qrcus offers all the users an unique opportunity to view the documents, with the great advantage that the documents are saved in one place while links are created to other platforms/programs.

How it helps

With the help of the Qrcus Integration Kit it is much easier to create a formatted job-aid, simulation, training, manuals or Business Process Procedures and save at a single point of entry. RWD uPerform® automatically records and creates documents during this procedure. It creates the procedure as well as the simulation. This information is then saved in local clients and after approval can be published via the RWD uPerform® server. In SAP Solution Manager with the integrated workflow the document gets the attention of the responsible employees to review, edit and approve it.

Schematic integration view QRCUS INTEGRATION KIT for SAP Solution Manager. The documents are saved in SAP Solution Manager and with links the documents are made available in other platforms.

Now with the Qrcus Integration Kit it is possible to dispatch the documents in every way you want without creating copies of the original document. By modifying the original document all the related documents are synchronized as well.

Qrcus Integration Kit

The Qrcus Integration Kit offers a fully integrated package with a single point of entry for changes for all related documents. The users are able to view the documents via all the appropriate channels (e.g. SAP Solution Manager, SAP Business Suite, RWD uPerform® and Intranet Portal). Qrcus is your SAP Solution Manager partner who can offer the implementation of the Qrcus Integration Kit in a short period without a large investment no matter which version of Solution Manager is in use.

Qrcus; Business Solutions Provider

Qrcus is the Dutch based SAP consulting firm focused on optimal business alignment and deployment of SAP solutions. We operate Pan European from a central position in the so called Euregio. From local SMB businesses to global industry leaders, Qrcus has been serving companies of nearly all sizes and industries around the world, developing best practices and delivering SAP software business solutions.
